Aims and Scope: *Neurochemistry International* publishes (within 5 months of acceptance) papers primarily concerned with the metabolism and function of the nervous system. Papers are also published which deal with the chemical aspects of the anatomy, pathology, physiology, pharmacology and genetics of the nervous system, as well as the biochemistry of the nervous tissues. The journal also publishes material showing the relationship of fundamental neurochemical observations to basic neurology, neuropharmacology, chemical pathology and neurotransmission of the nervous system.
The Executive Editors and Publisher would welcome comments from authors concerning improvements and/or clarification on the aims and scope of the journal.
